25X1

During the past several weeks, the major SMB emphasis on this project has been to insure that sufficient Depot assets are on hand to support the 99 line items required for each Station. This has been a constant goal, but difficult to achieve because we started out with better than a 50 percent procurement vs. stock ratio. Due to aggressive efforts by the Analyst on Commodity Section B, [redacted] who is the action officer on this project, and excellent response from the Small Purchases Staff, we are now able to support the OC PRS Installation completely from Depot assets.
